

Cedar Planters

These red and yellow cedar planters are made with joinery and finished with an environmental exterior stain. The tops are stained white and the bottoms have either had a clear finish or an ultra saturated stain applied.

They are designed and built in our Fernwood workshop by Dieuwertje von Aesch, a trained furniture maker with many years of experience in exterior construction. These planters are built to last for either indoor or outdoor use.

The attention to detail is found in every aspect of the planter construction including holes for proper drainage from the top to the bottom ensuring plant health.

Pricing
